

Part 1: Website Diagram

Part 2: Page Descriptions

1. Home Page

This page serves as the main entry point of the website. It provides navigation links to all major functionalities, including searching programs, viewing programs, adding users, submitting applications, viewing reports, and accessing the about page.

2. Search Assistance Programs Page

This page allows users to search for healthcare assistance programs based on criteria such as state, eligibility category, or program type. Users can input search parameters through a form.

3. Search Results Page

This page displays the results of the user's search query. It lists programs that match the specified criteria. Each result includes basic program information and a link to view more details.

4. Program Details Page

This page shows detailed information about a selected healthcare assistance program. It includes program name, provider information, eligibility requirements, and additional details.

This page retrieves data by combining multiple database relations (e.g., Programs and Providers).

5. Browse Programs Page (View Programs)

This page displays a list of all available healthcare assistance programs in the database. Users can browse through the programs and select one to view detailed information.

This page retrieves data from the database and may combine multiple relations.

6. Add User / Applicant Page

This page allows users to enter information to create a new applicant record in the system. The form collects basic user data such as name, contact information, and eligibility-related details.

This page demonstrates inserting data into the database.

7. Add User Confirmation Page

This page confirms that a new user/applicant has been successfully added to the database. It may display the submitted information for verification.

8. Add Application Page

This page allows users to submit an application for a healthcare assistance program. The form links a user/applicant to a selected program and records application details. This page demonstrates inserting data into the database.

9. Add Application Confirmation Page

This page confirms that the application has been successfully submitted and stored in the database.

10. Reports Page

This page provides access to analytical views of the database. It includes links to reports that display combined data from multiple relations.

11. Programs by Provider Page

This page displays a list of healthcare programs along with their associated providers. This page retrieves and displays data using a join between the Programs and Providers relations.

12. Applications by User Page

This page displays a list of applications along with the corresponding users and programs. This page retrieves and displays data using joins between Applications, Users, and Programs relations.

13. About Page

This page provides general information about the purpose of the system and how users can benefit from it.
